AUTHOR: Sul'din, A. V.

TITLE: On Certain Subgroups of Simple Real Lie Groups (o nekotorykh podgruppakh prostykh veshchestvennykh grupp Li)

PERIODICAL: Uch. zap. Kazansk. un-ta, 1955, 115, Nr 14, pp. 157-158

ABSTRACT: Let  $G_k$  be a complex unimodular group;  $G_b$  its real form, consisting of transformations retaining the given form of Hermite invariant; and let  $K$  be a subgroup of triangular matrices with zeros below the main diagonal. The classes of subgroups adjoint in  $G_b$  and of the type

$$g^{-1}Kg \cap G_b \quad (g \in G_k)$$

are investigated. It is proved that every class contains a subgroup of the type  $uL'Ku \cap G_b$  where  $uvu^*=S$ ;  $v$  is a matrix of  $V$  form and  $S$  is a symmetrical permutation-of-axes matrix. This subgroup consists of matrices  $u_{KUL}$ , where  $ksk^* = S$ . Transitivity classes of the subgroup  $G_b$ , acting in the uniform space  $G_k/K$ , are also described.

TITLE: The Measure of Wiener and Its Application for Approximate Methods. I

PERIODICAL: Izvestiya vysshikh uchebnykh zavedeniy. Matematika, 1959,  
Nr 6, pp 145-158 (USSR)ABSTRACT: Let  $C$  be the space of all functions  $x(t)$ ,  $x(0)=0$  continuous on  $[0,1]$ . The space  $L_2(C)$  consists of all functions  $f(x)$  on  $C$  for which

$$(1) \quad \|f\|^2 = \int_C |f(x)|^2 d_w(x) < \infty.$$

The author considers functionals of the type of functions

$$f(x) = \int_0^1 q(t)x(t)dt. \text{ The approximations } \tilde{f}(x) = \sum_{i=1}^n c_i x(t_i) \text{ are}$$

sought, where the constants  $c_i$  and the knots  $t_i$  are determined from the condition that  $\tilde{f}$  is the best approximation of  $f$  in the sense of the norm (1). § 1 has an introducing character. § 2

Card 1/3

SOV/140-59-6-19/29

The Measure of Wiener and Its Application for  
Approximate Methods. I

treats the best approximations of the kind  $\int_0^1 x(t) dt \approx \sum_{i=1}^n c_i x(t_i)$

and § 3 is devoted to the best approximations  $\int_0^1 q(t)x(t) dt \approx$

$\approx \sum_{i=1}^n c_i x(t_i)$ . The author proposes new formulas for the calculation  
of Fourier coefficients, e.g.:

$$(10) \quad \int_0^1 \sin 2\pi m t \cdot x(t) dt \approx \left[ \frac{\sin \frac{2\pi m}{n}}{\frac{2\pi m}{n}} \right]^2 \cdot \frac{1}{n} \sum_{k=1}^n x\left(\frac{k}{n}\right) \sin \frac{2\pi mk}{n} + \\ + \frac{x(1)}{2\pi m} \left[ \frac{\sin \frac{2\pi m}{n}}{\frac{2\pi m}{n}} - 1 \right].$$

AUTHOR: Sul'din, A.V.

TITLE: The Measure of Wiener and its Application to Approximation  
Methods. IIPERIODICAL: Izvestiya vysshikh uchebnykh zavedeniy. Matematika, 1960.  
No. 5, pp. 165 - 179TEXT: The present paper is a continuation of (Ref. 3) and uses the same  
notations.Let  $F(x)$ ,  $F_i(x)$ ,  $i = 1, 2, \dots, n$  be linear functionals of  $L_2(C)$ :
$$F(x) = \int_0^1 x(t)d\delta(t), \quad F_i(x) = \int_0^1 x(t)d\delta'_i(t), \quad \text{where } \delta(t), \delta'_i(t)$$
are right continuous functions with a bounded variation. Among the  
approximation formulas

(1) 
$$F(x) \approx \sum_{i=1}^n c_i F_i(x)$$

that is called the best one for which the integral :

Card 1 / 5

86190

The Measure of Wiener and its Application  
to Approximation Methods. II

S/140/60/000/005/017/021  
C111/C222

$$I = \int_C \left[ F(x) - \sum_{i=1}^n c_i F_i(x) \right]^2 d_w(x) \text{ has a minimum as a function in } C.$$

It is shown that one obtains the best approximation formula by determining the constants  $c_i$  from

$$\sum_{i=1}^n c_i \int_0^1 \sigma_i(t) \sigma_k(t) dt = \int_0^1 \sigma(t) \sigma_k(t) dt$$

This formula is strong in the subspace  $C$  generated by the functions

$$\varphi_k(t) = \int_0^t \sigma_k(t) dt .$$

Let  $R_m$  be an  $m$ -dimensional subspace of  $C$  with the base  $\varphi_1(t), \varphi_2(t), \dots, \varphi_m(t)$ ,  $m \leq n$ . The author seeks the best formula (!) under the

additional condition that it is strong in  $R_m$ . Let the functionals  $F_i$  be orthogonally normed, let the base be chosen so that :

Card 2/5

S6100

The Measure of Wiener and its Application  
to Approximation Methods. II

S/140/60/000/005/017/021  
C11/C222

$\sum_{i=1}^n F_i(\varphi_k)F_i(\varphi_s) = \delta_{ks}$ . Then the  $c_i$  for the best formula can be determined from

$$c_i = (F, \varphi_i) + \sum_{s=1}^m \left[ F(\varphi_x) - \sum_{k=1}^n (F, F_k)F_k(\varphi_s) \right] F_i(\varphi_s)$$

For an approximation by functionals of polynomial type, the best formula is

$$F(x) \approx \sum_{i=1}^n \int_0^1 (t-1)^{\alpha} (t) P_i(t) dt \int_0^1 x(t) d[(t-1)P_i(t)]$$

where  $P_i(t)$  are Jacobian polynomials on  $[0, 1]$  normed with the weight  $(t-1)^2$ .

The form is strong in the space of all polynomials of degree  $n+1$  and lower which satisfy the conditions  $P(0) = 0$ ,  $P'(1) = 0$ .

The best among the formulas  $F(x) \approx \sum_{k=1}^n a_k \int_0^1 x(t) d \sin k \pi t$  is that

Card 3/ 5

B210P

The Measure of Wiener and its Application  
to Approximation Methods. II

S/140/60/000/005/017/021  
C111/C222

where  $a_k = 2 \int_0^1 \sigma(t) \sin k\pi t dt$ . The best among  $F(x) \approx \sum_{k=1}^n c_k x(t_k)$  is  
the formula

$$F(x) \approx \sum_{k=1}^n \int_{t_{k-1}}^{t_k} [-\sigma'(t) dt] \frac{x(t_k) - x(t_{k-1})}{t_k - t_{k-1}}$$

✓

The formula is strong in the subspace generated by

$$\psi_k(t) = \begin{cases} t & \text{for } t < t_k \\ t_k & \text{for } t \geq t_k \end{cases}$$

The author gives the best formula :  $F(x) \approx \sum_{k=1}^n c_k x(t_k)$  being strong in  
the space of all polynomials  $P(t)$  of degree  $\leq m$ ,  $P(0) = 0$ , and then it is  
used for obtaining best quadrature formulas being strong in the same space.  
These results are used for an approximation of the  $\delta$ -function.

CITED SOURCE: Uch. zap. Kazansk. un-t, v. 123, no. 6, 1963, 3-35

TOPIC TAGS: approximation theory, regression method, least square principle, probability, approximated formula reliability, approximated formula error, Biner measure

TRANSLATION: The regression method, in whose foundations is assumed the principle of least squares, is used to obtain various approximated formulas. This is done from the point of view of probability. The concept of reliability of the approximated formula is introduced, replacing the concept of error. Thus, the author notes that the reliability in practice is computed more simply than the error. In functional space, the Biner measure is used as well as measures induced by the Biner measure.

TOPIC TAGS: probability, statistics, random process, Wiener process

TRANSLATION: A Wiener process  $x_t$  with mean 0 and dispersion  $Dx_t = a^2 t$ , where  $a^2$  is an unknown parameter, is studied. A random value,

$$S_A^2 = \frac{1}{A} \int_0^A \frac{x_{ta}^2}{e^{ta}} da,$$

is introduced, which is a nonskewed and conditional (for  $A \rightarrow \infty$ ) distribution for  $a^2$ . The characteristic function and the distribution function for the random variable  $S_A^2$  are computed. There are no references whatsoever to work in which other evaluations of the dispersion of a Wiener process are given. V. Alekseyev

2892. Sauer, S., and Schmitz, J., Methods of reducing cost of concrete construction by proper dimensioning. *Ind. Eng. Chem. Res. Constr.*, Vol. 2, No. 5, Sept. 1953.

Costs of concrete in construction sites are analyzed, and a method for finding reduction costs is suggested. The dependence of material requirements on dimensions is determined. A method for calculating the cost of concrete is presented. An example demonstrates how to use these data under various conditions. References are made to K. Syrma, T. Klier, and to previous papers on theory and practice in concrete construction. Published by State Organization, M.G.I.C. and I.G.U. Budapest, 1951

1852. A CASE OF THE STURGE-WEBER SYNDROME WITH ORGANIC DISORDERS OF CHARACTER - Przypadek choroby Sturge-Webera z organicznymi zaburzeniami charakteru - Sulestrowska H. and Billewicz O. Odd. Psychiat. Dziec. Klin. Chor. Psychicznych A.M., Gdańsk - NEUROL. NEUROCHIR. PSYCHIAT. POL. 1958, 8/1 (121-126) Illus. 6

Description of a case in a 9-year-old girl. Among the typical symptoms of the disease, a unilateral angioma of the face, epilepsy and characteristic calcifications of the cerebral cortex in the occipital region were observed. Deviations in the neurological state were very discrete and there were no symptoms of glaucoma. In the psychic sphere, attention is called to an absence of the symptoms of mental deficiency or dementia, while a considerably intensified psychomotor impulsion, quite distinct euphoria and strongly expressed organic disorders of character were present.

of a 10-year-old boy with adiposo-genital dystrophy, whose intelligence level was very high (wunder child) with artistic and literary abilities. His psychic disturbances corresponded to endocrinic characteropathy with an anancastic disposition and phobias, which existed since he was 4 years old. A largactil treatment gave good results.
